
Kickstart: Network Pentest

This material is prepared for use in *Network Pentest* and was prepared by Thomas Bach xtba@kea.dk and Henrik Kramselund Jereminsen, xhek@kea.dk It contains the very basic information to get started!

These course and exercises are expected to be performed in a training setting with network connected systems. The exercises use a number of tools which can be copied and reused after training. A lot is described about setting up your workstation in the Github repositories.

The main site for materials are: <https://kea-fronter.itslearning.com/>

I try to gather all information there!

So to get kickstarted in this course:

- ☐ Make sure you can login to Fronter
<https://kea-fronter.itslearning.com/>
- ☐ Lecture plan for this course is in Fronter
- ☐ Read about setup of exercise systems here
<https://github.com/kramse/kramse-labs>
- ☐ Check BIOS settings - make sure CPU settings have virtualisation turned ON
- ☐ Select and install virtualisation software
- ☐ Get the books! Either on paper or PDF

Hopefully we will have a fun and enjoyable time in this course.
